

# Canopies

Martec Engineering offers a fully integrated service for the design, manufacture, installation and erection of both internal and external canopies. All Martec Engineering's canopies are suitable for domestic and commercial installation.

Our range includes 3 styles:

## Premium Canopy

The premium Canopy offers a budget friendly and fit for purpose solutions. The Premium Canopy is manufactured from mild steel, galvanised then powder coated to the customers choice of standard RAL number.

Martec Engineering's Premium canopy provides an excellent solution for a variety of applications included flatted developments, school and public buildings.

The premium canopy is available as a free-standing or built in product.

The Premium canopy is available in a range of standard colours.

## Superior Canopy

The Superior canopy is attractive and elegant in design whilst offering a robust and durable solution. The superior Canopy is manufactured from glass and mild steel, which is galvanised and powder coated to the customers choice of standard RAL number.

The Superior canopy is available as a built in product only.

The Superior canopy is suitable for use in public buildings, office blocks, housing developments and flatted developments.

## Deluxe Canopy

Martec Engineering's Deluxe canopy provides a contemporary and stylish addition to any development. The Deluxe canopy is manufactured in stainless steel and glass. Its simple and elegant design allows the door entrance to remain light.

The Deluxe canopy provides a stylish and practical solution in a variety of applications including luxury flatted developments and office buildings.

The Deluxe canopy is available as a free-standing or built in product.
